Who we are

Name of Venture: **Smart Bags**

Why ?

People carry valuable items daily (laptops, phones, money, ID cards), but **bags still have no advanced security.**

What ?

We create **smart, secure, technology-enabled bags** that protect belongings automatically

How ?

- By integrating:
 - ✓ Fingerprint Lock
 - ✓ GPS Tracking
 - ✓ Motion Detection
 - ✓ Anti-cut Material
 - ✓ Mobile App Alerts

Problem statement:

Daily users face:

- Bag theft in buses, trains, colleges
- Misplacing bags during travel
- No system to detect someone opening/cutting the bag
- No way to track a stolen bag
- Traditional bags offer zero smart protection

Solution:

A technology-enabled anti-theft & anti-loss bag offering:

- Fingerprint-based smart lock
- GPS tracking with app connectivity
- Motion & distance alert system
- Tamper detection (zip/cut alarm)
- Lost mode with real-time location
- Secure hidden compartments

Problem/Opportunity

CONTEXT 1. Theft incidents are increasing in public transportation. 2. Students & employees carry expensive items every day. 3. No bag currently gives full digital protection. 4. Users want smarter, safer daily accessories. 5. Large potential for tech-integrated lifestyle products.	PROBLEM 1. Bags get stolen or misplaced easily. 2. No tracking or alert system in traditional bags. 3. Belongings like laptops, phones, hard drives get lost permanently. 4. Users feel insecure in crowded places. 5. No centralized alert or monitoring solution.	ALTERNATIVES 1. Normal bags → zero smart features 2. Basic anti-theft bags → just hidden pockets 3. GPS tags → only tracking, no alarms 4. Smartlocks → expensive and external
CUSTOMERS 1. College students 2. Office employees 3. Travellers 4. Delivery partners 5. Photographers & tech professionals	EMOTIONAL IMPACT 1. • Fear of losing items • Stress during travel • Anxiety in crowded areas • Low confidence in safety QUANTIFIABLE IMPACT • 80% reduction in bag loss & theft • 90% user confidence increase with fingerprint lock • 50% improved safety during travel • Real-time alerts reduce theft attempts by 70% • High adoption potential among students & travellers	ALTERNATIVE SHORTCOMINGS • Normal Bags – No intelligence • GPS Tags – Easy to remove • Padlocks – Can be cut • Anti-theft bags – Only hidden zips, no alerts • Mobile tracking apps – Track phone, not the bag Gap → No fully integrated security bag exists.

Problem Interviews And Surveys Results

- How many customers did you interview?

100

- What was the interview mode?

Offline

- How many of them agree this is a problem and wants a solution?

92

- How many of them said they don't need a new solution?

Market Size Estimation

How to calculate market size?

1. TAM – Total Addressable Market

Students, employees & travellers in our district cluster.

Example assumption: 3 districts → 8 lakh potential users.

2. SAM – Serviceable Available Market

Only users needing security bags

30% → 2.4 lakh users.

3. SOM – Serviceable Obtainable Market

Initial adoption 3–6%

→ 25,000 – 40,000 users.

Estimated initial market size:

✓ 25K–40K potential customers immediately.

Customer Persona

Arul Murugan

Age: 26

Location: Salem, Tamil Nadu

Profile: Early-stage startup founder (running a small online fashion business)

Motivations

Needs a smart solution for peace of mind

Goals

Protect laptop, ID card, project files.

Frustrations

- Crowded buses & college spaces
- Fear of theft during travel

Bio

Mani S is a final-year engineering student who wants to build his own startup but struggles to find the right mentorship, funding, and connections. He is motivated to succeed but feels lost without proper support and guidance. He needs a simple digital platform that helps him grow confidently with expert advice and collaboration opportunities.

Solution

Solution:

We offer a smart security-based backpack designed to protect people from theft, loss, and damage of their valuable belongings. Our solution combines fingerprint locking, GPS tracking, motion alerts, and anti-cut material — reducing risk, increasing safety, and giving users complete confidence while traveling or commuting.

Advanced Security System: Fingerprint lock, GPS tracking, motion sensors, and tamper alerts ensure complete protection of belongings.

- **Smart App Connectivity:** Users can connect the bag to a mobile app to receive real-time alerts, updates, and live tracking information.
- **Emergency & Safety Support:** SOS alert, lost mode activation, and last-seen location help users quickly recover misplaced or stolen bags.
- **Secure Storage Design:** Hidden compartments, anti-cut material, and shock-proof pockets provide extra protection for laptops and valuables.

Benefits of our solutions

Improved Safety & Security: Users get instant protection for their valuables through fingerprint lock, GPS tracking, and real-time alerts.

- **Saves Time:** Reduces the effort spent searching for lost bags or worrying about theft — the app instantly shows the bag's live location.
- **Boosts Confidence:** Users feel safe and stress-free while traveling, knowing their belongings are fully protected.
- **Reduces Theft Risk:** Anti-cut material, motion alerts, and anti-theft zippers significantly decrease the chances of bag theft or tampering.
- **Smart & Convenient:** A mobile-connected, intelligent bag that keeps users informed anytime, anywhere.

PROBLEM • Entrepreneurs struggle to access mentors, investors, and expert guidance. • They waste a lot of time searching for funding, support, and collaboration. • There is no unified platform to connect startups with the right resources and networks. EXISTING ALTERNATIVES • Local business support centers and startup workshops • Online startup groups and forums (WhatsApp / Facebook etc.) • YouTube tutorials and generic online courses	SOLUTION Web-based digital platform that connects aspiring entrepreneurs with mentors and investors while also providing collaboration opportunities.. The platform includes a smart search system to easily find resources, courses, experts, and partners KEY METRICS • Number of active users per day/week. • Average navigation success rate.Time saved per navigation session. • User satisfaction/feedback score.feedback scores	UNIQUE VALUE PROPOSITION • First-of-its-kind campus-specific navigation platform. • Combines indoor + outdoor navigation with event integration. HIGH-LEVEL CONCEPT • Google Maps for Your Campus”A digital map that knows every classroom, event, and facility—helping users move smarter, faster, and stress-free. • Our platform positions itself as a leader in delivering innovative and practical support solutions that help founders overcome challenges	UNFAIR ADVANTAGE • Integration with existing entrepreneurship cells and institutions • Seamlessly connects with college innovation hubs, incubation centers, and business programs. CHANNELS • University app or website integration. • QR codes at entrances and bulletin boards. • Social media campaigns & student orientation programs.	CUSTOMER SEGMENTS • Students (new & existing). • Visitors and parents • .Faculty and non-teaching staff. • Recruiters and event participants. EARLY ADOPTERS • Freshers and transfer students. • Campus tour groups and admission visitors. • Event management committees. • Tech-savvy student clubs and organizations.
COST STRUCTURE • App development and maintenance costs. • Map design, data collection, and integration. • Cloud hosting and GPS/QR system infrastructure. • Marketing and campus awareness campaigns.Admin and technical support costs.				

Core Features for MVP

- 1. Founder & Mentor Directory:** A simple, searchable listing of entrepreneurs, mentors, investors, and support organizations so users can quickly find the right people.
- 2. Skill & Resource Finder:** A smart search tool that helps users discover learning materials, startup toolkits, templates, courses, and expert guides for any topic.
- 3. Mentor Connect System:** A streamlined feature where founders can request guidance, ask doubts, or schedule sessions with experts from various fields.

MVP

Process of a digital startup support and networking platform

1. User Onboarding

Users register their smart bag using the mobile app by scanning a QR code or connecting via Bluetooth.

2. Bag Preferences & Item Input: Users enter their personal preferences such as:

- security mode (fingerprint, passcode, auto-lock),
- frequently carried items (laptop, keys, wallet, charger),
- reminder needs (e.g., alert if laptop is missing),
- travel or usage style (student, office, traveler).

Communication & Collaboration –

- **Instant Security Alerts** – notifications when the bag is moved, opened, or left behind.
- **Location Sharing** – users can share their bag's live

Progress Tracking & Feedback – The system regularly updates usage milestones such as travel activity, security events, and item-tracking history.

Market Strategy

1. Setting Specific Goals

User Target

Reach 5,000 students, office-goers, and travelers **across 3 districts (Erode, Salem, Namakkal) in the first year.**

Institution Target

Partner with 10–15 colleges, coaching centers, and workplaces **to** promote the smart bag as a safety + convenience product.

2. Market Research & Segmentation

Target Users:

Primary: Students, daily commuters, and travelers who regularly carry laptops, books, gadgets, and personal valuables.

Secondary: Parents, colleges/schools, office employees, coaching centers, and travel groups who prioritize safety, theft prevention, and smart tracking features for bags.

Competitor Analysis:

Existing bags in the market — whether school bags, laptop bags, or travel backpacks — offer only basic storage and design, with no smart safety or tracking features.

Very few India-focused smart bags exist, and the ones available are **expensive**, offer **limited functionality**, and lack features like GPS tracking, fingerprint lock, item reminders, or anti-theft alerts.

Core Features:

Mentor connect, funding access, startup resources, & collaboration hub

Pilot Phase:

Launch with one local incubation center or select colleges, gather feedback, refine Smart bag.

3. Marketing Strategy

•Branding:

- Build a relatable, student-friendly name and visual identity.
- Use a friendly, tech-forward tone in all communication.

•Digital Marketing:

- Promote SmartBag on Instagram, LinkedIn, and campus community groups.
- Run focused campaigns during admission season and orientation weeks.
- Partner with colleges to feature SmartBag on official websites or student portals.

•On-Ground Promotion:

- Collaborate with **student ambassadors**, campus clubs, and E-Cells to boost adoption.
- Set up **demo booths** on campus and use **QR-based instant app downloads** during orientation events.

4. Growth Plan

Begin with one pilot college to test and refine the product.

Funding Plan

How much funding is required to reach the next level of the venture?

₹20,00,000

How much has been bootstrapped? If not, why?

Currently under development — no major funds bootstrapped yet.

Reason: The project is still in the prototype stage; funds are mainly required for platform development, mentorship integrations, and deployment.

How much can be bootstrapped?

₹2,00,000 – ₹3,00,000

How much external funding is required? If not, why?

₹13,00,000 – ₹14,00,000

1. Product Development – ₹8,00,000 (40%)

Platform development, backend system, UI/UX, and feature testing.

Goal: Build a fully functional and user-friendly startup support platform.

2. Mentor & Technology Integration – ₹3,00,000 (15%)

Integrating mentor onboarding system, video sessions, secure cloud storage, and smart search features.

Goal: Enable seamless connection with mentors, investors, and resources.

3. Marketing & Outreach – ₹3,00,000 (15%)

Partnership campaigns with colleges, startup events, and promotional branding.

Goal: Increase user adoption and awareness among entrepreneurs and institutions.

4. Operations & Team Support – ₹2,50,000 (12.5%)

Team stipends, legal & admin costs, and support operations.

Goal: Maintain efficient execution and platform functionality.
